

Materials Needed:

- 35 Pink 5" Balloons
- 2 White 5" Balloons
- 1 Red 5" Balloon
- 1 White 260 Balloon
- 2 Blue colored circles (approximately 2.5" in diameter)
- 2 Black colored circles (approximately 1.25" in diameter)
- 1 RMS™ 2' Heart Framework
- Adhesive

Directions:

Open RMS™ 2' Heart and follow packaged directions unless otherwise directed below.

Inflate 33 pink balloons to 4"

Inflate 2 pink balloons to 3"

Inflate 2 White balloons to 4".

Inflate 1 Red balloon to 4".

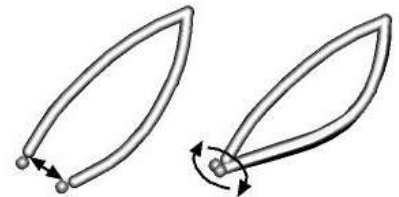

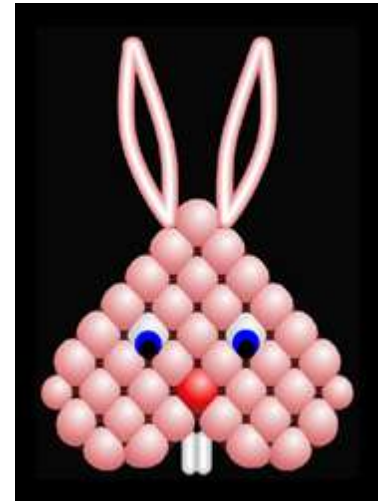

Load balloons into RMS™ 2' Heart per "Rabbit Heart" diagram
For extra security, we recommend tying the necks of the balloons together in pairs before inserting them into the Matrix.

To Make The Eyes: Attach black circles to blue circles. Now attach blue circles to white balloons.

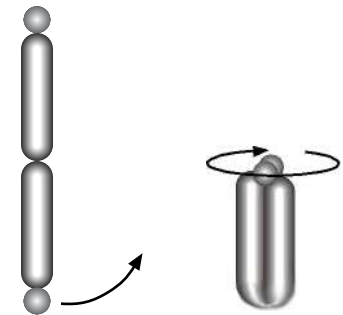

To Make The Ears: Inflate 2 pink 260 balloons leaving a 1" nipple on each. Twist a 1" diameter bubble in the inflated end of one #260 balloon. Squeeze the #260 in the middle to puff up the nipple. Twist a 1" bubble in the nipple end. Twist the # 260 balloon near the middle. Twist the two bubbles together. Insert one of the two bubbles between the Matrix strap and the balloon adjacent the point of the heart. (See the diagram.) Position the two bubbles to hold the #260 upright. Repeat this procedure on the other side of the point of the heart for the second #260 ear.

To Make The Teeth: Inflate 1 white 260 balloon to 12" in length. Tie both ends of the #260, leaving about 1" nipple on the uninflated end. Cut off the excess (uninflated end of the balloon). Twist a 1' diameter bubble in the inflated end of the #260. Squeeze the #260 in the middle to puff up the nipple. Twist a 1" bubble in the nipple end. Twist the balloon in the middle. Twist the two bubbles together. Insert one of the bubbles between the Matrix strap and the center balloon in the "V" of the heart. Massage the relative position of the balloons and bubbles which meet at the "V" to hold the "teeth" in place.

***Note:** This design may be created in RMS™ 3' Heart Framework. Use 9" or 11" round latex balloons underinflated to 6" instead of the 5" balloons underinflated to 4".

FOR EARS: make bubbles on both ends of the #260 balloons. Twist the two ends together. Insert one of the bubbles under the matrix strap to hold these balloon ears in place.

FOR TEETH: make bubbles on both ends of a 12" length of inflated #260 balloon. Twist it in the middle and then fold the halves and twist the two bubbles together. Insert one of the bubbles under the matrix strap to hold these balloon teeth in place.
